ABOUT ME

When it comes to assisting clients, customers or collaborating with team members, I succeed on making a positive impression and creating a favourable impact. I love coordinating efforts and creating a collaborative environment. Adapting to new surroundings is something I do fast. What fuels me is the eagerness to learn new stuff, as I enjoy the process of it, and using that new knowledge to solve problems. I am commited to being punctual, never running behind schedule. I take my responsibilities seriously and am committed to both personal and professional growth.

PROJECTS

Marketing Agency Website | *Wix, AWS, SMTP Setup, UI/UX, DNS Setup, SEO, Project Lead, Enhanced Email Spoofing Protection* — Mar. 2023 – May 2023
- Supervised the project and helped with the co-ordination myself and rest of the developer team to move swiftly
- Set up a secured server for the organization to send e-mails without the possibility of fraudulent activity happening

Chemistry Analysis Lab Website | *UI/UX, SEO, Project Lead, Lead Developer, HTML/CSS, 11ty, Javascript, DNS Setup, Nunjucks, CMS, Hosting* — Nov. 2023 – Jan. 2024
- Led the project's development, co-ordinating the project's developers and development timeline
- Played a pivotal role in front-end development, implementing necessary additions to help with assistive technologies, SEO and user experience
- Developed the website to support multiple languages, english and greek
- Set up the backend of the site, allowing for easy, quick and secure content changes

Personal Portfolio Project | *UI/UX, Project Lead, Lead Developer, HTML/CSS, TypeScript Javascript, React, NextJS, CMS, SCSS/SaSS, DNS Setup Hosting Handle* — Jan. 2024 - March 2024
- Handled all the project's work, UI/UX, hosting, development, security and backend
- Implemented necessary additions to help with assistive technologies, SEO and user experience

ThreeJS 3D Globe (published NPM Package) | *JavaScript, TypeScript, ThreeJS* — June 2024
- Forked the three-globe NPM package and made my own modifications in the code to optimize performance on lower end devices by reducing the number of polygons rendered on the sphere from 6000 to any value the developer desires
- Published the code on NPM for anyone to use freely

Full Stack Absence System (Project in Softline) | *VueJs, Laravel, UI/UX, Sole Developer, MySQL, Tailwind CSS, Backend Testing, Typescript, Authentication Handling, RESTful API handling* — Aug. 2024 - Sept. 2024
- Assigned the creation of a Full-Stack application within 1 month period for practice in Softline
- Received code review from a Senior developer with over 20 years of experience
- Designed the UI. Listened to suggestions and incorporated elements for improved UX
- Created every single page and every single Web and API endpoint
- Wrote tests for the Backend API endpoints

EXPERIENCE

Public   January 2024 – June 2024
Sales | Customer Service   *Limassol, Cyprus*
- Enhanced communication and teamwork skills in a customer-centric role
- Assisted customers in the finding of their ideal device
- Coordinated effectively with team members to deliver great customer experiences

Freelancer Website / Single Page Application Developer   March 2023 - June 2024
Client Scouting | Developer | Client Communicator   *Limassol, Cyprus*
- Build relationships and trust with business clients
- Managed their desired projects
- Lead the team developers making swift progress for each project
- Assisted in the coding, design, copywrite, hosting, DNS, and other aspects of each project
- Communicated with the clients about every update and built off of their feedback

Softline Computer Systems   June 2024 - July 2024
Full-Stack Intern   *Limassol, Cyprus*
- Collaborate in a team environment with other interns to learn and develop a Laravel Full Stack application
- Build RESTful API endpoints and integrate them to the Front-End
- Had code reviews with senior developers, assisting us with advice or pointing out flaws in the code
- Utilized the VueJS framework for the Front-End with inertia to develop a SPA

Softline Computer Systems   August 2024 - Present
Junior Full-Stack Developer   *Limassol, Cyprus*
- Build a Full-Stack application within 1 month period, receiving code reviews from Mid & Senior developers
- Collaborate in a team environment with other Mid & Senior developers
- Build numerous new RESTful API endpoints in the Laravel framework, each with its own tests using PHPUnit
- Actively playing a key role in the development of a new Front-End, using VueJS, VueRouter and Vitest
